Activate Azure
with Administration & Governance

Proof of Concept

Duration: 4 Days | **Focus Area:** Upgrade, Migration, and Deployment | **Difficulty**: Level 300

Activate Azure with Administration & Governance will help you build your Azure governance foundation and educate you on Azure management proven practices. The Microsoft proven practices on governance and administration demonstrated in this offering originate from the Azure Scaffold and the Azure Reference Architecture (AZRA). Both of these resources have guided the largest Azure deployments across all industries. This 4 day engagement with a Microsoft engineer includes assistance and a series of knowledge transfer sessions to increase your IT team's technical and operational skills. It also includes Proof of Concept scenarios deployed in your Dev/Test Azure environment.

◆ OUTCOMES ◆

01
EDUCATION
Increase your cloud team's knowledge with required skills to better implement and manage Azure services.

02
HANDS-ON PROOF OF CONCEPTS
Guide your teams to understand how to apply governance principles in your Azure environment.

03
NEXT STEPS
Gather a set of recommendations and define next steps activities to reach desired state.

◆ BENEFITS ◆

Accelerate organizations' digital transformation and cloud adoption by helping your team to obtain necessary skills and knowledge to define a scalable Azure Management and Governance model, minimizing the risks and protecting critical core infrastructure by setting a set of strategies and rules in place for existing and future implementations.

EXPERT GUIDANCE
Develop a greater understanding of the work required to achieve Azure enablement strategies.

PROVEN PRACTICES
Based on Azure Architectural Governance and Management best practices recommendations and considerations.
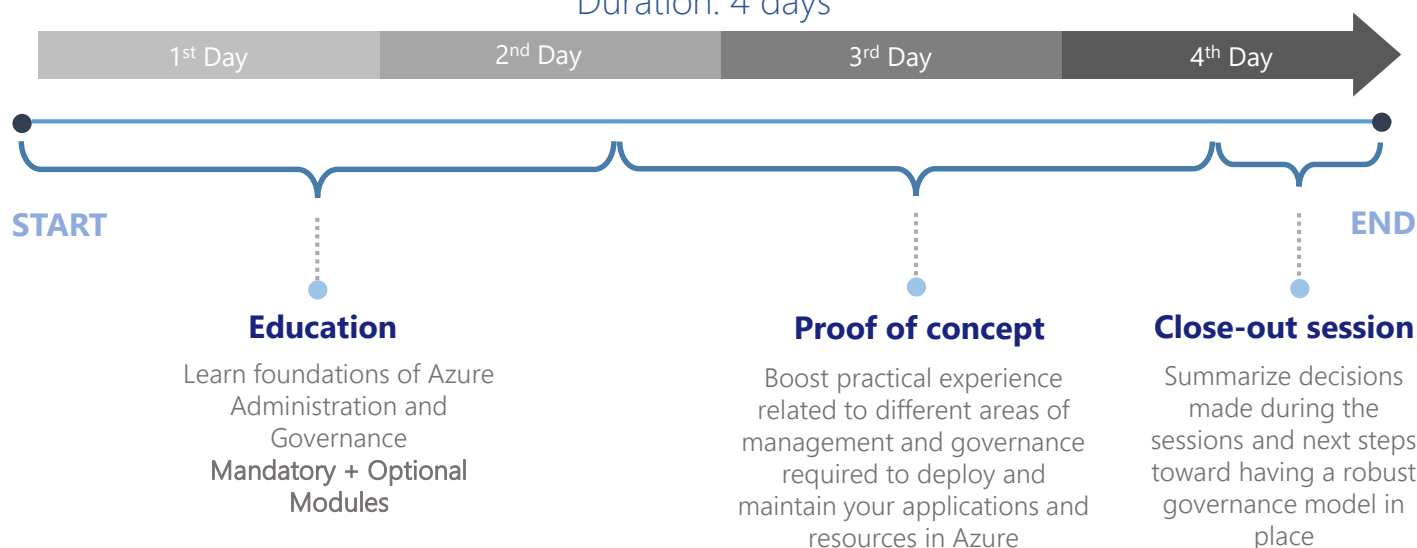

BEST PRACTICES
Use proven design patterns, tools, and frameworks to govern, optimize cloud management and improve security.

Microsoft

Duration: 4 days

| 1st Day | 2nd Day | 3rd Day | 4th Day |

START

END

Education

Learn foundations of Azure Administration and Governance
Mandatory + Optional Modules

Proof of concept

Boost practical experience related to different areas of management and governance required to deploy and maintain your applications and resources in Azure

Close-out session

Summarize decisions made during the sessions and next steps toward having a robust governance model in place

ENGAGEMENT SCOPE

Familiarize yourself with a collection of proven practices and services that are designed to enable management of various Azure resources at scale, with a focus on the following topics:

- Enrollment and Subscription model
- Identity and Access control
- Naming Convention
- Azure Resource Management
- Azure Policy
- Resource Tracking
- Critical Resource Control
- API Access to Billing Information
- Networking Controls
- Resource Monitoring
- Backup and Disaster Recovery

ADDITIONAL DETAILS

Prerequisites for the delivery include:
- Customer must have at least one valid and non-trial Azure subscription.
  - A Dev/Test subscription is highly recommended.
- Network and Internet connectivity must exists between a PoC machine from customer location and Azure services and Azure Portal.
- Access to EA and Azure Subscription.
- Meeting room with facilities to present sessions.

Recommended participants include:
- Technical Decision Makers
- IT Managers
- Cloud Architects
- Networking Team
- Security Team
- Identity Team
- Infrastructure Team
